Businesses' concerns heighten over fear that traffic re-routing to accommodate proposed plans for pedestrianisation will be hopelessly flawed. Existing signage proves to be totally inadequate to cope with the everyday events, whereby HGV drivers relying on their SATNAV for directions continue to enter King Street causing endless queues of traffic, and damage to parked cars. There is a feeling that between Highways and Cheshire East, there has been a failure to address the existing issues that continuously prove that the signage is inadequate, why should they be able to provide a solution to a new set of issues that will no doubt create new challenges. If you have any views or concerns over
Pedestrianisation
of King Street, the
Knutsford Business Club
will be holding a Meeting at 6.00pm in the
Angel Hotel on Tuesday 18th May 2010
for any traders or businesses that would like to have their ideas and concerns shared and supported.
